G<sub>1</sub>/G<sub>2</sub>/G<sub>3</sub> GLUE BOARDS

## **Glue boards for scrawling insects, mice and rats**

### **Models G1, G2, G3**

The glue boards' models G1, G2 and G3 are designed mainly to capture mice and rats. However, they can also be used for controlling other plagues, such as crawling insects.

We present this special glue in three different sizes: small (G1), medium (G2) and large (G3).

This product is in the international market for many years and has achieved excellent results at various levels. It has an attractive and lasting odor to rodents. The constant quality control ensures a higher efficiency with high performances in terms of pest control.

This glue is non-toxic.

### ***Features***

Plastic tray with a special glue inside to capture crawling insects and rodents. These glue boards are offered to the clients in pairs for the glue protection. The trays have a locking system where the trays are packed against each other.

These glue boards are offered in three different sizes:

Model G1 – 130x56x10mm

Model G2 – 177x130x10mm

Model G3 – 258x130x10mm

### ***Instructions***

Separate the glue boards individually and place them on the ground where you can find traces of rodents passing through.

Check the glue boards daily or when you realize a rodent was captured.

To replace the glue boards the use of gloves is recommended in order to avoid contact with the rodents.

In case there isn't a capture in 2 or 3 days the glue board must be replaced.

In case of contact from the glue with the skin, just remove the traces of glue with soap and water.

The glue board model G1 can be used together with our box Glue Trapper – specially designed for this glue board. Like this, the glue board stays protected against external aggressions (water, dust, etc.) and its durability raises considerable.

**GLUE TRAPPER**

### ***Packaging***

Model G1 – Ref.: 200.48 – available in cartons of 128 pairs

Model G2 – Ref.: 200.46 – available in cartons of 24 pairs

Model G3 – Ref.: 200.065 – available in cartons of 24 pairs
